

IN THE CLAIMS:

This listing of the claims shall replace all previous versions of the claims.

Please amend claim 1 as follows:

1. (Currently Amended) A rabbit ~~having rabbit~~ skin containing a kallikrein production inhibition activity, said rabbit skin having rabbit skin tissues and obtained by the process comprising: vaccinating rabbit skin tissues with vaccinia virus, feeding the rabbit having rabbit skin tissues vaccinated with vaccinia virus, killing the rabbit when its skin tissues is inflamed, skinning the rabbit, eluting at least a portion of the rabbit skin, and fractionating under a nitrogen atmosphere the eluted portion of the rabbit skin based on molecular weight.

2. (Original) The rabbit skin according to claim 1, wherein the said vaccinia virus is vaccinia virus Lister strain.

3. (Original) The rabbit skin according to claim 1, wherein the said vaccinia virus is vaccinia virus Ikeda strain.

4. (Original) The rabbit skin according to claim 1, wherein the said vaccinia virus is vaccinia virus Dairen strain.

5. (Original) The rabbit skin according to claim 1, wherein the said vaccinia virus is vaccinia virus EM-63 strain.

6. (Previously Presented) The rabbit skin according to claim 1, wherein the said vaccinating rabbit skin tissues with vaccinia virus is effected by injecting subcutaneously 0.1-0.4 ml solution containing  $10^6$ - $10^9$  viruses/ml each site, 100 to 250 sites per rabbit weighing 1.5-3 Kg.

7. (Previously Presented) The rabbit skin according to claim 1, wherein the said rabbit is a Japanese white rabbit.

8. (Previously Presented) The rabbit skin according to claim 1, wherein the said rabbit is a New Zealand white rabbit.

9. (Previously Presented) The rabbit skin according to claim 1, wherein the said rabbit is a Chinese rabbit.

10. (Previously Presented) The rabbit skin according to claim 1, wherein the said rabbit is a Blue-violet rabbit.

11. (Previously Presented) The rabbit skin according to claim 1, wherein the killing of the rabbit when its skin tissues are inflamed is effected when the rabbit skin inflammatory tissue shows visible blains accompanying with changing color from redness to mauveness and becomes thick, and its subcuticle and hip become swollen.

12. (Previously Presented) The rabbit skin as in any of claims 1-11, which possesses a specific alteration of rhythm in environmental temperature activity of 0.5 iu/g or more.

13. (Cancelled)

14. (Previously Presented) The rabbit skin of claim 1, wherein a drug is formed comprising water and an extract of the rabbit skin, whereby the extract of the rabbit skin is obtained by:

extracting a portion of the rabbit skin with an organic solution following skinning the rabbit;

processing the extract of the rabbit skin with an acid and an alkali; and

eluting the extract of the rabbit skin.

Serial No. 10/532,687

Amendment B filed May 8, 2008

Response to Office Action mailed February 8, 2008

15. (Previously Presented) The rabbit skin of claim 1, wherein a health food is formed comprising water and an extract of the rabbit skin, whereby the extract of the rabbit skin is obtained by:

extracting a portion of the rabbit skin with an organic solution following skinning the rabbit;

processing the extract of the rabbit skin with an acid and an alkali; and

eluting the extract of the rabbit skin.
